

paediatric endocrine research grants

Growing health in young people.

Pfizer Australia will allocate AUD\$150,000 per annum to this initiative as part of our continued commitment to Paediatric Endocrinology research in this country.

This research grants program is open to medical graduates who have obtained specialist qualifications within the last five years, or are currently in advanced training. Applications will also be considered on a case by case basis from graduates returning to research after an appropriate break. Applicants may apply for up to AUD\$55,000 (including GST) in research funding. Each grant is for 12 months.

Applications are welcome from medical graduates who are currently residing, working, and conducting research within Australia. Grant recipients must conduct the majority of the research project within Australia.

All applications are reviewed initially by two independent expert referees. The final decision is then made by the Australian Physicians Independent Committee (APIC), composed of 5 leading specialists.

Find out how to apply today: www.apecgrants.com.au

Applications for 2009 Paediatric Endocrine Grants close on 29th May 2009.
